DETAILED ACTION

This Office Action is in response to Applicants' amendment filed May 14, 2003.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 14 and 17-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Admitted Prior Art Figures 1-3 in view of Ibnabdeljalil et al. (6,365,978 B1) and Kameda et al. (6,130,484).

Admitted Prior Art Figures 1-3 teach an apparatus comprising: semiconductor substrate having an input output (I0) ring, the I0 ring having a bond pad portion and an active buffer portion; the bond pad portion including: a first bond pad; a second set of bond pads having one or more bond pads; and a third bond pad, wherein the second set of bond pads is immediately adjacent to the first and third bond pads. Admitted Prior Art Figures 1-3 further teach the second set of bond pads including one or more bond pads. However, Admitted Prior Art Figures 1-3 fail to teach a conductive trace coupling the first bond pad to the third bond pad; a package substrate having a power portion; a first bond wire connected to the first bond pad and the power portion, wherein one

Art Unit: 2822

of the first bond pad and the third bond pad being connected to the active buffer portion of the I0 ring. Ibnabdeljalil et al. teach a conductive trace 64 coupling a first bond pad **65** to a third bond pad **66** (Figure 7, cols. 7-8, lines 52-67 and 1-38). Kameda et al. teaches a package substrate having a power portion; a first bond wire 7 connected to the first bond pad 5 and the power portion; a second bond wire 3a connected to the third bond pad 11b and the power portion, wherein one of the first bond pad and the third bond pad being connected to the active buffer portion 2 of the 10 ring (Figures 1-2, col. 3, lines 37-65). Since Admitted Prior Art Figures 1-3, Ibnabdeljalil et al. and Kameda et al. are from the same field of endeavor (bond pad semiconductor devices), the purpose disclosed by Kameda et al. would have been recognized in the pertinent art of Admitted Prior Art Figures 1-3 and Ibnabdeljalil et al. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the bond pad structure of Admitted Prior Art Figures 1-3 by incorporating the bond pad structures as taught by Ibnabdeljalil et al. and Kameda et al. to improve the reliability of the integrated circuit IC (col. 4, lines 24-33).

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Prior Art Figures 1-3, Ibnabdeljalil et al. and Kameda et al. (6,130,484) as applied to claim 14 above, and further in view of Lebby et al. (5,5543,958).

Kameda et al. further teach a first bond pad **5** and a third bond pad **4** being power pads (Figures 1-2, col. 3, lines 37-65). However, Prior Art Figures 1-3, Ibnabdeljalil et al. and Kameda et al. fail to teach a power pad coupled to a fixed voltage

Art Unit: 2822

source. Lebby et al. teach a power pad **27** coupled to a fixed voltage source (Figure 1, col. 4, lines 42-46). Since Admitted Prior Art Figures 1-3, Ibnabdeljalil et al., Kameda et al., and Lebby et al. are from the same field of endeavor (semiconductor structures), the purpose disclosed by Lebby et al. would have been recognized in the pertinent art of Admitted Prior Art Figures 1-3, Ibnabdeljalil et al., and Kameda et al. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the bond pad structures as taught by Prior Art Figures 1-3, Ibnabdeljalil et al. and Kameda et al. by incorporating the power pad of Lebby et al. to provide a structure that requires a sufficiently small amount of power to be utilized in portable electronic equipment.

Claim 16 is rejected under 35 U.S.C. 103(a) as being unpatentable over Prior Art Figures 1-3, Ibnabdeljalil et al. and Kameda et al. (6,130,484) as applied to claim 14 above, and further in view of Ngai et al. (US 2001/0010471 A1).

Kameda et al. further teach a first bond pad 5 and a third bond pad 4 being power pads (Figures 1-2, col. 3, lines 37-65). However, Prior Art Figures 1-3, Ibnabdeljalil et al. and Kameda et al. fail to teach a fixed voltage source being one of Vdd and Vss. Ngai et al. teach a fixed voltage source being one of Vdd and Vss (page 5, paragraph [0062]).

Since Admitted Prior Art Figures 1-3, Ibnabdeljalil et al., Kameda et al. and Ngai et al. are from the same field of endeavor (semiconductor structures), the purpose disclosed by Ngai et al. would have been recognized in the pertinent art of Admitted Prior Art Figures 1-3, Ibnabdeljalil et al. Therefore, it would have been

Art Unit: 2822

obvious to one having ordinary skill in the art at the time the invention was made to modify the bond pad structures as taught by Prior Art Figures 1-3, Ibnabdeljalil et al. and Kameda et al. by incorporating the fixed voltage source of Ngai et al. to provide high performance interconnects.

Response to Arguments

Applicant's arguments filed 05-14-03 have been fully considered but they are not persuasive. The Admitted Prior Art Figures 1-3 is relied upon for the teaching of a semiconductor substrate and a second set of bond pads immediately adjacent to the first and third bond pads. Trace 64 of Ibnabdeljalil et al. is coupled to three bond pads (65 & 66s) in Figure 7. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See In re Fine, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and In re Jones, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, the motivation to modify Admitted Prior Art Figures 1-3 by incorporating Ibnabdelialil et al. and Kameda et al. is found in Kameda et al. (col. 4, lines 24-33).

Art Unit: 2822

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ida M Soward whose telephone number is 703-305-3308. The examiner can normally be reached on Monday - Thursday, 6:30 am to 5:00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amir Zarabian can be reached on 703-308-4905. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9318 for regular communications and 703-872-9319 for After Final communications.
